

LAKE FOREST, CALIF.--- CMC Supplies RoHS Complaint Assemblies for Military use.

Posted: 4/13/2009 @ 08:51 AM

Carr Manufacturing Company (CMC) has begun supplying Amphenol PT series Miniature Cylindrical Connectors and Raychem 203M series Tinel Lock Adapters on assemblies that meet the EU standard for RoHS compliance.

CMC has been on the forefront of RoHS complaint assemblies when working with various Military Prime Contractors. By using RoHS compliant components from Raychem and Amphenol, CMC assists their clients in servicing both Commercial and Military applications with one product. This eliminates redundant product offerings and increases profitability. With the introduction of the Amphenol and Raychem product into CMC's existing RoHS compliant manufacturing line, CMC was able to offer products that not only meet the RoHS standards, but also meet or exceed the quality and endurance standards that Military products require.

About CMC.

CMC is a California based corporation specializing in the design and manufacturing of standard and custom assemblies to the electronic, industrial, medical, and military industries. Its unique approach to contract manufacturing allows OEM's to offload their electro-mechanical assembly problems to CMC's experienced staff, thereby allowing the OEM to focus on its core product. Headquartered in Lake Forest, Calif., CMC has over 18 years of combined experience in designing, manufacturing, and supplying various electro-mechanical assembly solutions to the OEM market.
